

# ED Code Cards

## A portable pediatric emergency medicine reference guide

Created by Calvin Lowe, MD, FAAP,  
Transport Director, Emergency and Transport Medicine,  
Children's Hospital Los Angeles

### What are ED Code Cards?

ED Code Cards are quick, convenient, badge-sized reference guides for care of the pediatric patient in the emergency or critical care setting.

### A set of eight double-sided, laminated cards includes:

- Code medication dosages
- Pediatric fluid replacement
- Pain/sedation/paralysis management for ICU patients
- Normal vital sign ranges
- Useful pediatric formulas
- Pediatric equipment size guide
- and more!

### Benefits:

- *Portable*—hanging on your badge
- *Convenient* reference for pediatric emergency information
- *Instant access* to pre-calculated dosages
- *Saves time*—with the flip of a card, immediately get the info you need instead of still inputting and scrolling in digital devices.

### Great for:

- ED nurses
- ED physicians
- ED residents/interns
- Paramedics/EMTs
- Any health care professional who does not work in pediatrics on a regular basis

*I originally created ED Code Cards for ED nurses in response to a demand for a quick pediatric ED reference guide. The cards were a huge hit and are now very popular with residents and physicians as well.*
