

2012 Gustaf Retzius Neuroanatomy Competition

Prizes

Grand prize

\$1,000 and limited-edition, sculptured trophy

2nd Prize

\$500

3rd Prize

\$250

Subject Matter

Normal human neuroanatomy
Birth (full term) to adult.
Includes: CNS, skull, orbit and vascular anatomy

Who

Medical students
Residents
Interns
Fellows
Neuroscience graduate students

When

Monday, March 26, 2012
6 p.m.

Where

Children's Hospital Los Angeles
4650 Sunset Boulevard
Los Angeles, CA 90027
Page Conference Room

Gustaf Retzius (1842 - 1919)

Noted Swedish anatomist and histologist at the Karolinska Institute, Gustaf Retzius was one of the leaders in research during the classical period of neuroanatomy.

"His comparative studies of a large series of subprimate, simian, and human brains, fetal and adult, clarified many of the more difficult problems of brain morphology." (Haymaker-Schiller, Founders of Neurology).
