

“Tight Glycemic Control in Critically Ill Children: BitterSweet”

Vijay Srinivasan, MBBS, MD, FCCM

Assistant Professor of Anesthesiology,
Critical Care and Pediatrics
Perelman School of Medicine,
University of Pennsylvania
Attending Physician, Department of
Anesthesiology and Critical Care Medicine
The Children's Hospital of Philadelphia

Wednesday, February 20, 2019

12-1 p.m.

The Saban Research Building Auditorium
4661 Sunset Blvd., Los Angeles, CA 90027

Lunch will be provided to seminar guests,
first come, first served.

**Help us save plastic! Bring your own water bottles.
Water will be available to fill your bottles.**

The talk by Dr. Srinivasan will cover the historical arc of tight glucose control in critical illness starting with adults and concluding with children. He will discuss the importance of reproducibility of results in clinical trials using the cautionary example of tight glucose control in critical illness. He will go on to critically review the strengths and weakness of the recent Heart and Lung Failure – Pediatric INSulin Titration (HALF-PINT) study in critically ill children. Finally, he will provide his perspectives on the trials and tribulations of serving as a site principal investigator for a large multicenter study and lessons learnt from his journey.

Hosted by Barry Markovitz, MD, MPH

Chair, Anesthesiology Critical Care Medicine
Children's Hospital Los Angeles
Professor of Clinical Pediatrics and Anesthesiology
USC Keck School of Medicine
