**REFLEX/CONFIRMATORY TESTING NOTICE**

The Laboratory of Children's Hospital Los Angeles will perform reflex or confirmatory tests on certain tests due to clinical reasons. It is important to note that the subsequent tests may generate additional charges. If one desires, the tests that are not required are available without reflex/confirmation. Please specify if you do not want reflex/confirmatory testing.

**MEDICARE INFORMATION**

**NATIONAL COVERAGE DETERMINATION (NCD) FOR PHYSICIANS**

Medicare has issued Frequency Limitations for many of the NCD policies. The Frequency Limitations state that Medicare will cover the cost of certain tests under specific conditions at specific intervals. An ABN should be collected for Frequency Limitation tests since it is difficult to determine when and if a specific test was performed in the past. The Frequency Limitation tests are listed below.

**FREQUENCY LIMITATIONS**

Alpha-fetoprotein	HCG, Qual (Preg)	HGB	PT (Prothrombin Time)
Carcinembryonic antigen	HCG Quant	HIV Testing	PTT
CBC w/Platelets + Diff	HDL Cholesterol	Lipid Panel	T4, Free
Collagen crosslinks (any method)	Hemoglobin A1C	Iron	TSH
Digoxin	Hemogram	TIBC	Tumor Antigen by immunoassay/ CA125
Fecal occult blood	Hemogram w/Platelets (ABC)	LDL, Direct	Tumor Antigen by immunoassay/ CA 15-3/CA 27.29
Gamma glytamyl transferase	Hematocrit	PSA, Free & Total	Tumor Antigen by immunoassay/ CA 19-9
Glucose fasting	Hep B Surface Antigen	PSA, total (diagnostic)	Urine Culture
Glucose random	Hepatitis Panel A, B, C Acute	PSA, Reflexive	

Medicare will only reimburse tests that are deemed to be medically necessary for the diagnosis and treatment of the patient, rather than for screening purposes. ICD-10 diagnosis code (s) must be provided for each test ordered. Attach separate ABN form when ordering any investigational tests on Medicare patients. For more information and a complete list of investigation/experimental tests please visit the CMS website: [www.cms.gov](http://www.cms.gov)
