### Other Tests:

- Celiac Screening Panel
- Celiac Diagnostic Panel
- Comprehensive Metabolic Panel
- HSV1/2 and VZV PCR*
When ordering any investigational tests on specific intervals, an ABN should be collected. Medicare has issued frequency limitations for some tests such as:

- RPR:
- Fecal occult blood
- Collagen crosslinks (any method)
- Gamma glutamyl transferase
- Glucose random
- Total Protein

The Laboratory of Children’s Hospital Los Angeles will perform reflex or confirmatory tests on certain tests due to clinical reasons. It is important to note that the subsequent tests may generate additional charges. If one desires, the tests that are not required are available without reflex/confirmation. Please specify if you do not want reflex/confirmatory testing.

### Lipid Panel

- Cholesterol
- Triglyceride
- HDL Cholesterol

### Celiac Diagnostic Panel

- Celiac Screening Panel
- Epstein Barr Virus Panel
- Hepatitis Panel, Acute

### Film Array Respiratory Panel

- Adenovirus, Coronavirus 229E, Coronavirus HKU1, Coronavirus NL63, Coronavirus OC43, Human Metapneumovirus, Influenza A, Influenza B, Parainfluenza 1, Parainfluenza 2, Parainfluenza 3, Parainfluenza 4, Respiratory Syncytial Virus and Rhinovirus/Enterovirus

### Medicare Information

Medicare has issued Frequency Limitations for many of the NCD policies. The Frequency Limitations state that Medicare will cover the cost of certain tests under specific conditions at specific intervals. An ABN should be collected for Frequency Limitation tests since it is difficult to determine if a test was performed in the past. The Frequency Limitation tests are listed below.
