

Developing a Convergent Mind in the Conduct of Research

Friday, August 9, 2019

12:00pm – 1:00pm

Location: The Saban Research Building Auditorium

Children's Hospital Los Angeles

Lunch will be provided

Workshop Synopsis:

This workshop will present how “Convergent Science” could revolutionize our approach to research and how as faculty and trainees, we could take advantage of opportunities at USC to develop a “Convergent Mind”.

Objective:

The objective of this workshop is to make participants aware of the convergence revolution that is taking place in biomedical research.

Target Audience:

All faculty members, clinicians, and post-doctoral trainees involved in biomedical research (basic, translational, and clinical).

Supported By:

The USC Center for Excellence in Research &
CHLA Office of Academic Affairs
