Optimization of Treatment: RVP1
Highlighted Testing
Conference Schedule

OPTIMIZATION OF TREATMENT

Respiratory Viral Panel 1: Viral testing during influenza season allows for definitive diagnoses, avoids unnecessary use of antibiotics and allows for the prompt initiation of appropriate treatment. CHLA's RVP PCR Panel 1 detects three respiratory viruses: influenza A/B and respiratory syncytial virus (RSV) using a rapid molecular technology. The test is highly sensitive and specific and can be completed in a matter of hours. The RVP1 panel has value in patient care management, infection control, and epidemiological monitoring.

HIGHLIGHTED TESTING

Respiratory Vital Panel 1 - PCR

- CPT & Quantity: 87631
- Lab - Microbiology
- TAT: 12-24 Hours

Minimal Residual Disease BM B-ALL Flow COG B-ALL MRD Panel

- CPT & Quantity: 88184, 88185 x11, 88188
- Lab - Diagnostic Immunology & Flow Cytometry
- TAT: 48 Hours

OncoKids® Cancer Panel

- CPT & Quantity: 81455, G0452
- Lab - Center for Personalized Medicine
- TAT: 2-3 Weeks

CONFERENCE SCHEDULE

Quarter 2 Conference Schedule:

Stay tuned for upcoming conferences to receive more information at our booth and speak to faculty experts.

OCTOBER 16-20 - American Society of Human Genetics (ASHG) - San Diego, CA.

Featuring: OncoKids®, Constitutional and Oncology Genetic Testing

NOVEMBER 1-3 - Association for Molecular Pathology (AMP) - San Antonio, TX.

Featuring: OncoKids®, Vision Panel, and Microbiology/Virology Services
