CHLA offers the following pediatric gynecology services:

**Adolescent and Young Adult Medicine**
The Division of Adolescent and Young Adult Medicine provides consultation, diagnosis and/or treatment to females 12-21 years of age for the following conditions:
- Heavy menstrual bleeding
- Contraception (including Nexplanon placement)
- Painful menses
- Vaginal discharge (diagnosis and treatment)
- Sexually transmitted diseases
- HIV
- Nonsurgical vaginal lesions
- Polycystic ovarian syndrome (PCOS)
- Sexual activity, including:
  - Initiation and how to engage in safer sex
  - Making healthy reproductive decisions, including abstinence
- Yeast vaginitis
- Genital warts
- PAP smears

For questions, contact Sandra Vidal at svidal@chla.usc.edu or 323-361-3936, or Lesly Romero at leromero@chla.usc.edu or 323-361-4760.

**Endocrinology and Metabolism**
The Division of Endocrinology and Metabolism offers services for the following conditions:
- Hyperandrogenism/polycystic ovarian syndrome (PCOS) – Clinic led by David Geller, MD, PhD
- Turner syndrome – Clinic led by Brian Miyazaki, MD, and Mitchell Geffner, MD
- Disorders of puberty

The Division will accept new referrals for patients up to 18 years of age.

For questions, call 888-631-2452.

**Hematology – Adolescent Clinic**
This specialized, multidisciplinary clinic offers the combined expertise of hematologists (experts in bleeding disorders) and adolescent medicine physicians (experts in menstrual issues), providing a level of care and support unmatched in the Los Angeles metropolitan area for young women with heavy menstrual bleeding. The clinic meets two Tuesdays a month at the main campus in the Hematology-Oncology Clinic area (fifth floor of the outpatient tower), and includes a team of physicians, nurse practitioners, social workers, psychologists and physical therapists.

**Hematology**
